

Instructor's Name: Dr. Lewis-Jordan

Instructional Day(s): **Nov. 27 - Dec. 8, 2023**

	<b>Monday Instructional Day : 1</b>	<b>Tuesday Instructional Day : 2</b>	<b>Wednesday Instructional Day : 3</b>	<b>Thursday Instructional Day : 4</b>	<b>Friday Instructional Day : 5</b>
<b>Standard(s) Assessed</b>	Explain how interest rates affect various consumer decisions.	Explain how interest rates affect various consumer decisions.	Explain how interest rates affect various consumer decisions.	Explain how interest rates affect various consumer decisions.	Explain how interest rates affect various consumer decisions.

**Objectives/  
Indicators**

After completing this lesson, students will be able to: explain what a credit score is and how one is calculated. Analyze the different methods available to view their credit score. Critique different credit score scenarios and formulate a plan on how to improve their credit score.

After completing this lesson, students will be able to: explain what a credit score is and how one is calculated. Analyze the different methods available to view their credit score. Critique different credit score scenarios and formulate a plan on how to improve their credit score. By learning how credit scores work, and the various factors that are used to calculate them, young people can empower themselves to make

need to apply. The application process varies depending on the type of loan you seek but generally involves providing information about your income, employment history, and credit score.

Lenders use this data in deciding whether or not they will approve your application and provide you with specific terms.

looking to purchase a house, lease an automobile or launch a business venture, having access to credit makes it simpler than ever to secure the funding necessary.
