

agnet School

New Ellenton Middle STEAM

- By the end of 6th grade, students will possess the skills of an Innovative Designer.
- By the end of 7th grade, students will possess the skills of an Innovative Designer, Digital Creator, and Collaborator.
- By the end of 8th grade, students will possess the skills of an Innovative Designer, Digital Creator, Collaborator, and Creative Communicator.

### THE FUTURE

of the industry is to be a more integrated and efficient organization.

It is not just about the technology, but about the people and the processes.

The industry is moving towards a more data-driven and analytics-based approach.

It is about the ability to collect, analyze, and act on data in real-time.

The industry is also moving towards a more collaborative and cross-functional approach.

It is about breaking down silos and fostering a culture of innovation and continuous improvement.

The industry is also moving towards a more sustainable and socially responsible approach.

It is about reducing carbon footprint and promoting ethical practices.

The industry is also moving towards a more customer-centric approach.

It is about understanding customer needs and providing personalized solutions.

The industry is also moving towards a more agile and flexible approach.

It is about being able to respond quickly to market changes and customer demands.

The industry is also moving towards a more transparent and accountable approach.

It is about providing clear communication and reporting to stakeholders.

The industry is also moving towards a more secure and resilient approach.

It is about protecting data and ensuring business continuity.

The industry is also moving towards a more inclusive and diverse approach.

It is about embracing different perspectives and fostering a sense of belonging.

The industry is also moving towards a more innovative and creative approach.

It is about thinking outside the box and finding new solutions.

The industry is also moving towards a more collaborative and open approach.

It is about sharing knowledge and resources with the industry.

The industry is also moving towards a more data-driven and analytics-based approach.

Figure 1. Geological map of the United States showing major geological units and faults. The map is a detailed representation of the geological structure of the continent, with various units color-coded according to their age and lithology. The legend on the left side of the map provides a key to the different geological units, ranging from the Precambrian to the Pleistocene. The map also shows major faults, rivers, and topographic features. A scale bar and a north arrow are included for reference.
