Law of Supply

1. **State the relationship between quantity supplied and price. Explain why it follows the Law of Supply.**

2. **Compare and contrast supply and demand curves. How do they differ? How do they relate? Use a graph to illustrate your answer.**

Supply and demand curves are two of the most important concepts in economics. They are used to explain how prices are determined in a market. The supply curve shows the relationship between the price of a good and the quantity of that good that producers are willing to supply. The demand curve shows the relationship between the price of a good and the quantity of that good that consumers are willing to demand.

Supply and demand curves are used to explain how prices are determined in a market.

Supply and demand curves are used to explain how prices are determined in a market.

Supply and demand curves are used to explain how prices are determined in a market.

5. The law of supply states that as

05

6. This relationship is known as a
