SIC Annual Goals

During the 19-20 school year, the PKMS School Improvement Council, decided to focus on after school supports for Math and ELA.

After-school remediation began in January. Each grade level had a specific day of support and there were two rooms of tutoring one ELA and one Math.

The team contacted community members that would be willing to assist with homework help or reading aloud on these days. This tutoring program was planned to be offered from the 2nd-3rd week in January to mid-May, but was unfortunately cut short due to the COVID-19 pandemic which led to school closures for distance learning in March of 2020.

Student Achievement

During the 2019-2020 school year, state testing was waived due to COVID -19. The last data points on Reading and math come from our screener for reading and math proficiency which is the Scholastic Reading and math inventory. The most recent testing data which was collected in the fall of 2020 showed current year-end proficiency in Reading to be at 59% and current proficiencies in math to be at 16%.

In the most recent SC school report card data, Paul Knox Middle School scored an

Additional Information

school of science, students are provided opportunities for collaboration, and acceleration within the framework of science. The program immerses students in an environment that emphasizes discovery and exploration, collaborative study, scientific research, use of scientific tools and technology, and a strong sense of community.

At Paul Knox we show strengths in standardized state testing, reading support, acceleration, and teacher and staff quality as determined by state survey results.

We are always looking to expand the parental involvement and have opportunities such as STEM night, Literacy night, PTO, and our middle grade expo to meet parental needs.
