architect's field report

Architect's field report is a document that records the architect's observations and experiences during a field visit. It is a key component of the design process, as it provides a record of the architect's understanding of the site and its context. The report should be written in a clear and concise manner, and should include a description of the site, the architect's observations, and the architect's conclusions. Refer to AIA 201.4.2.2.
