

Identify each tissue type by writing the correct name in the blank below it. Select different colors for each of the 4 tissue types, and color each picture according to the tissue type it is categorized as. Cut out the pictures and paste those onto a poster board. Using the textbook (pgs. 120-140), list the functions (s) and locations(s) of each tissue. Also, please provide common diseases and disorders associated with that type of tissue.
